Do something with a **meaning**. Work for an **international startup** company. **Change the world** for the better. If that's what you want join us as **(Senior-) Software Developer Android**.

WE are ...

an ambitious FinTech startup located in Frankfurt/Main. Our mission is to enable credit information sharing in the African microfinance industry to provide access to finance for anyone. We have won several FinTech and ICT awards and an incubator scholarship. Reputable partners and advisors back our operations. For more information visit **www.awamo.com.**

ANDERS GRÜNDER

Gefördert von: **KFW** STIFTUNG

WE need ...

a highly motivated and experienced

(Senior-) Software Developer Android (m/f)

at our headquarters in Frankfurt/Main to support our platform development.

YOUR challenges ...

* develop our Android app in accordance with our business requirements
* take ownership of the mobile application and frontend (Android, web)
* align with the product management team about features and priorities
* optimize your code after the initial deployment
* participate in the full project life cycle from design to go-live and support
* design and develop the business processes on a tablet PC
* ensure full offline capabilities for all processes, including bandwidth-optimized data synchronization
* integrate 3rd party hardware (fingerprint scanner)
* implement biometric authentication and data capturing
* write documentation for the platform and APIs

YOUR expertise ...

* degree in computer science or relevant work experience
* experience in developing software in a team (source code and build management, testing, continuous integration)
* financial services industry experience and/or emerging markets experience is a plus
* experience with several of the following technologies:
  ⇒ native Android development
  ⇒ web technologies (HTML, CSS, JavaScript)
  ⇒ data synchronization
  ⇒ experience in designing and accessing RESTful APIs
  ⇒ biometric authentication and integration of 3rd party hardware on Android
* strong analytical skills
* disciplined and structured approach to work
* Fluency in English and German/French is a plus
* experience in agile development environments

WE offer ...

* a highly motivated and professional team
* responsibility and room for your expertise
* the ability to create a new platform from scratch
* an attractive technology mix: mobile, biometrics, big data
* a reasonable fixed salary
* a very attractive bonus component
* flexible office hours including home office

YOUR contact ...
